

## STI testing

Woken up with an *itch*, a *tickle* or a *rash* in a spot you'd rather not mention? There's no shame in having an STI, it is just that common!

We offer appointment-based STI testing and treatment, so if you have symptoms or need to come in for a routine test, give us a call or book online and we'll be happy to help.

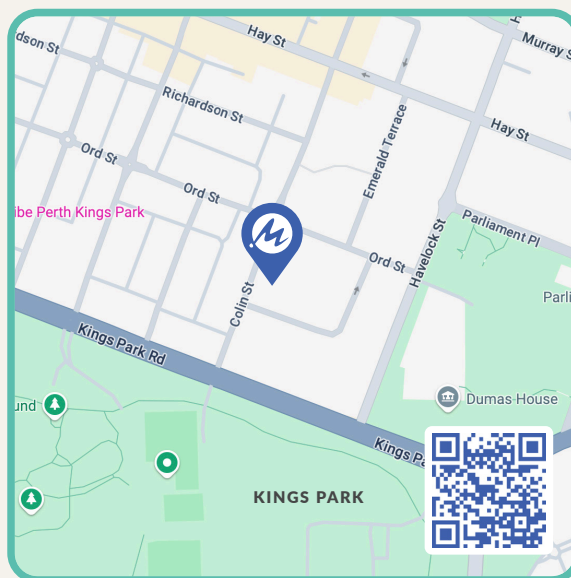

## HIV testing

We know that sometimes the thought of getting tested can be daunting, that's why we provide HIV testing in a casual and relaxed environment so no matter the outcome, we'll be here to support you through it.

If you're not comfortable being tested by us at the clinic, we can offer you **Atomo HIV self-testing kits** to use at home, which can give you results after 15 minutes. You can order these online at [hivtest.au](https://www.hivtest.au).

If you prefer to do the test with one of the nurses, please book in for an appointment or let our reception staff know.

take pride in your sexual health

## About M Clinic

**M Clinic** is Perth's only sexual health clinic specifically for gay, bi, trans, gender diverse and non-binary people, and for anyone who identifies as a man who has sex with men.

We provide **judgment-free and confidential** services including:

- **STI, HIV and BBV testing**
- **PrEP prescriptions**
- **Vaccinations**
- **Outreach and event testing**
- **HIV and STI info line, and**
- **Gender affirming care**

Our aim at M Clinic is to offer a service that is safe and inclusive, allowing you to get the care you need without concerns about your privacy.

For more details about our **services, bookings** and our **fees**, please visit our website.

## Did you know?

M Clinic is largely funded by the WA Department of Health. Because of this, we can provide **low cost** STI testing for our clients.

If you are experiencing financial difficulty, we can even provide your testing **for free!**

## PrEP prescriptions

**PrEP** (pre-exposure prophylaxis) is a medicine that requires a prescription which reduces your risk of contracting HIV from others, and helps reduce the spread of HIV in the community.

PrEP reduces the risk of getting HIV by **up to 99%** if taken correctly, and may help reduce any anxiety you may feel around contracting HIV.

## Vaccinations

As part of our service, we offer a range of sexual health related vaccinations for our clients who are not already immune, including for:

- **Hepatitis A and B**
- **HPV, and**
- **Mpox**

It is necessary to book an appointment ahead of time for all vaccinations that we provide.

## How often to test?

You should have an STI test every **3 months** if you have sex with multiple partners, **1 year** if you are in a monogamous relationship, or **even sooner** if you notice any symptoms.

## Gender affirming care

We are proud to offer gender affirming care for our trans, gender diverse and non-binary clients who are 18 and over seeking hormone replacement therapy.

Booking in for our gender clinic requires a referral from a GP. For all more details, please visit our **gender affirming care** webpage.

## Outreach and event testing

Just like our clients, we like to get out and see what Perth has to offer, that's why occasionally you may bump into us doing STI testing around some venues in Perth.

You can catch us outreach testing at:

- **Perth Steam Works, and**
- **Club 103**

If you are planning an event or know somewhere you think would benefit from outreach testing, please let us know; we are always happy to support the community.
